Green Harvest now stocking 3 Flexi Garden Frame Kits Two exclusive to Green Harvest

Made in Australia, Flexi Garden Frames® have been designed to improve productivity and to help make gardening easier. The open design lets air and light get to the whole plant, essential for healthy growth and allows for easy access to your plants to tend, harvest and water.

Long lasting and light weight, Flexi Garden Frames® are easy to handle and use, just click the components together and twist to secure. You no longer need to spend hours mending frames, no more hammers, screws or messy bits and pieces sticking out of your garden. No wooden stakes to install nor remove. Just lift these light weight frames off and place over the next bed or reconfigure quickly to suit your next crop.

Frames can be put together in a shape and size to perfectly fit your garden and plants and can be extended or completely changed when required.

Create natural climbing frames which peas, tomatoes and beans all love, as well as the perfect shape for netting or protective cloth to be easily put over.

Green Harvest 3 in 1 Kit

Exclusive to Green Harvest

A very versatile kit. Use all year round for jobs from seed to harvest. Build the frame you need at the time you need it and once that job is completed, take the frame apart and rebuild it for another purpose.

You can bespoke a frame to your needs or build

A Square Frame OR

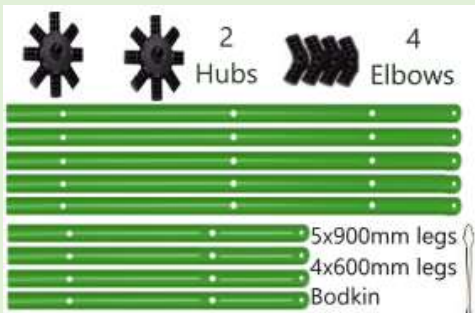

A Garden Bed Frame OR

A Frame for seedlings or brassicas

Green Harvest Ultimate Kit

Exclusive to Green Harvest

Kits come with most of the Flexi Garden Frames® components so you can play around to make a frame that fits your garden and the plants you are growing.

Make a permanent frame, or use different components at different times to make exactly what you need for the season and the plants you are growing.

Use leg spikes to secure to the ground, net clamps to connect netting and bodkin and plant ties to run a stringline around the frame to help keep its shape and turn it into the perfect climbing frame.
